

# MIND YOUR BRAIN

A Journey into the Mechanics of Learning, Emotions and Brain Care for Young Minds

## NEW RELEASE!! By John Joseph

A brilliant course of study for young minds. Your students' capacity to learn, their moods and attitudes towards school, their day-to-day behaviour and ultimately their academic success can be significantly boosted by Cognitive Strategy Training, or put more succinctly, learning about learning.

In these remarkable PowerPoint-based series of lessons, John Joseph and the Team at Focus Education give you the power, strategies and resources to share the secrets of learning with young minds.

Each colourful PowerPoint Section reveals amazing information about the human brain and how to use that information to enhance understanding and retention. John Joseph provides you with the exact slides he uses in his student presentations – over 500 PowerPoints, including many animations, developed through his teaching of over 100,000 students across 16 countries.

### The PowerPoints and associated Teachers' book includes:

- Course rationale
- Course overview
- Objectives and intended outcomes
- Step-by-step Lesson Plans and accompanying teacher notes
- Key definitions and terminology to explain the brain
- Background reading for teachers
- Easily accessible notes and images for student use
- Black-line masters for photocopying or digital pasting
- Digital anatomic models of skulls and brains for electronic dissections
- Step-by-step slides and movies for actual sheep brain dissections
- Neuron animations detailing what neurons are and how they work
- Brilliant, engaging animations to describe brain care
- Interactive digital games to highlight key points about the brain
- Examples of model-making and step-by-step digital instructions with graphics
- References, glossaries, manipulatives and internet resources

### Topics Include:

**Introduction:** Building students' willingness to undertake the course in meaningful ways and exploring the Four Worlds Model.

**Section 1: Anatomy of the Brain – neuroscience for beginners**

**Section 2: Neurons - tiny cells that learn**

**Section 3: Information processing - understanding learning and memory**

**Section 4: Learning Styles - assessing talents and strengths**

**Section 5: Brain Care - grow a healthy brain**

**Section 6: The Emotional Rooms – enjoying life's challenges**

Each full colour PowerPoint Section reveals research-based strategies to guide you and your students through a remarkable study of the human brain. The 200 page teacher's book provides step-by-step notes and anecdotes for each slide. This remarkable journey of discovery is fun, educative and designed to boost the motivation and confidence of young people as they develop as learners. The DVD is site-licensed.
